

How to Download and Use the [NOAA Marine Debris Tracker](https://marinedebris.engr.uga.edu/) Phone App

<https://marinedebris.engr.uga.edu/>

This app allows you to report the types of trash you find and logs GPS coordinates to track the litter's location.

Set up the app before your clean-up!

Download the app on your [iOS](#) or [Android](#) device.

After you have created an account:

1. Log in
2. Choose “**select an organization,**” Select the “**Ocean Conservancy ICC List**”
3. Start logging trash.

When you're finished, submit your data.

- If you are cleaning up with others, designate one person to record the type of trash on the **Marine Debris Tracker** app.
- To avoid contaminating your phone, don't use the app during a solo clean-up.
